

buying freeze.org

Stop funding those who are trying to take away workers' rights to organize! Join the boycott of Koch Brothers' Georgia-Pacific Products.

Half the country are progressives. We don't need anyone else. It will shrink their company in half and put them out of business!

Uniting in the streets and even recalls are good—but a centrally-coordinated boycott movement like this is the only certain way to effect lasting change. There are millions of Americans across the country who will stand in solidarity with the union workers of Wisconsin. Help us help you by doing your part to spread the word. Make the pledge. Join the boycott at:

buying freeze.org

Go to the site and pledge so that you can be counted, and Georgia Pacific will know the number who stand against them. Their products are bought every week by every household in America. Never again buy *Brawny*, *Angel Soft*, *Quilted Northern*, *Dixie*, or any other products listed on the site. We can put them out of politics, or put them out of business—it's their choice.

Stop viewing ourselves as only workers. Without us as their *customers*, they are out of business. Stop trying to work through a broken political system owned by corporations—they have no defense against coordinated, targeted boycotts.

While the recall petition is in full swing, make sure that everyone who signs the petition joins the buyingfreeze.org boycott—they will lose a million customers in Wisconsin alone! Download this flyer from the site, print and distribute them.

Start Our Own Public Health Benefits Option

The power of people united in solidarity can solve the health care crisis also. Together we can establish a private-industry, public option co-op. Beat them at their own game. Find out more and sign the petition at www.buyingfreeze.org!
